

How to Make Your First \$1,000 with AI Affiliate Marketing

Hey!

It's Matt Bacak and my son Dirk, and we're about to show you how to make your first \$1,000 with AI affiliate marketing.

Whether you're a seasoned marketer or just starting out, this guide will walk you through the exact steps you need.

These are the real strategies we use to make millions online every year.

So, buckle up, and let's get into it.

What is AI Affiliate Marketing?

If you're new to this, let's break it down.

AI affiliate marketing is one of the simplest ways to make money online.

You promote other people's products, and when someone clicks your unique affiliate link and makes a purchase, you get paid a commission.

Here's where AI comes in.

Tools like ChatGPT handle a lot of the heavy lifting...writing content, building email sequences, or creating videos.

This makes the entire process faster, smarter, and a whole lot easier.

Why Warrior Plus is Our Platform of Choice

When it comes to affiliate marketing networks, Warrior Plus is the one we swear by.

It's a massive marketplace that offers products designed to convert well, especially in the internet marketing and "make money online" space.

If you want to get started fast and see real results, this is the place to be.

Here's how you can get started on Warrior Plus:

First, create a Warrior Plus account by going to warriorplus.com and clicking on the "Sign Up Free" button.

Fill in your details, confirm your email, and log in to your account.

Once you're logged in, navigate to the Affiliate section by clicking on the Affiliate tab at the top.

From here, you can browse products, see their conversion rates, EPC (earnings per click), and more.

Scroll through the available products or use the search bar to look for something that aligns with your niche.

Check out the sales page of the product.

Ask yourself:

Would I buy this?

Is the product solid and something I can confidently promote?

Once you find a product you like, click the Request button to become an affiliate.

Some vendors will approve you automatically, while others may ask you to explain how you plan to promote their product.

Just be honest...

Tell them you're building your list through email marketing or social media.

After you're approved, you'll get a unique affiliate link.

This is how you'll get credit for the sales you generate.

Copy that link and get ready to promote.

Becoming a Mega Affiliate

Now, here's where it gets exciting.

We're not just talking about making a few bucks here and there.

We're talking about becoming a Mega Affiliate...

...someone who's at the top of their game, earning big commissions day in and day out.

That's what I've done, and Dirk is well on his way to doing the same.

Mega Affiliates dominate leaderboards, pull in serious cash, and know how to turn traffic into money like it's second nature.

This guide isn't just about making your first \$1,000...

It's your first step toward becoming a Mega Affiliate.

Think of it like this:

Right now, you're learning the basics...

But soon...

...you'll be stacking commissions like a pro, scaling your income, and enjoying the kind of freedom most people only dream of.

Organic vs. Paid AI Affiliate Marketing

Now that you've got your Warrior Plus affiliate link, you'll need to decide how to promote it...organically or through paid ads.

Organic marketing means creating content that attracts people without spending money on ads.

Use ChatGPT to create blog posts, YouTube scripts, or social media content.

Publish your content on platforms like TikTok, Instagram, YouTube, or Pinterest, and link back to your affiliate offer using the link you got from Warrior Plus.

LeadPages is perfect for creating an opt-in page to capture email addresses.

Once subscribers opt-in, send them a follow-up sequence through GetResponse that educates them about the product and eventually sends them your affiliate link.

You can use ChatGPT to draft your email sequence.

If you're ready to invest some money upfront, paid ads can give you faster results.

Use ChatGPT to help you write Facebook or Google ad copy.

Set up your campaign on Facebook or Google Ads, choose your target audience (people interested in making money online, digital marketing, etc.), and start with a small daily budget, then scale up as you see results.

Check your Warrior Plus dashboard to monitor your sales and EPC.

If a product is converting well, increase your ad spend.

If not, tweak your ad copy or switch to a different product.

Picking the Right Niche

Choosing the right niche is crucial.

You need to pick something that's going to make you money.

Look for niches that have a history of paying well.

The "make money online" space is perfect for Warrior Plus.

You want a niche that people are actively searching for.

Check out platforms like Google Trends to see what's hot.

If you can, pick something you're interested in.

You don't have to love it, but the more you know, the better you'll be at promoting it.

The Best AI Tools and Platforms to Use

Here's our toolkit for making money with affiliate marketing:

For hosting, we use Namecheap because it's affordable, reliable, and easy to set up.

For email marketing, GetResponse is our go-to because you can easily set up automated sequences that send out follow-up emails after someone opts into your list.

LeadPages is our go-to for creating high-converting landing pages and opt-in forms.

It's easy to use, and it integrates well with GetResponse to help build your email list.

ChatGPT is our secret weapon for everything from content creation to ad copy.

It helps us write emails, blog posts, and even videos that promote our Warrior Plus affiliate links.

If you're looking to create video content, InVideo AI can pump out fully edited videos in minutes.

Just drop in your prompt, and it'll handle the rest, including voiceovers.

If you're writing articles, Google Gemini is great for generating ideas and outlines that get clicks.

If you're running paid ads, Video Ad Vault will help you spy on successful ads and see what's working for others.

How to Start Promoting Warrior Plus Offers

Now that you've got your affiliate link and tools ready, here's a step-by-step guide to making your first \$1,000.

Set up your landing page using LeadPages to create an opt-in page offering something valuable, like a free guide or checklist.

Use ChatGPT to create the content.

After someone opts in, they should receive a series of emails.

Use GetResponse to automate this process.

You can ask ChatGPT to help you write the email series.

If you're going organic, use ChatGPT to write blog posts or social media content promoting your affiliate link.

If you're going the paid route, use ChatGPT to write your ad copy.

Post your content or launch your ad campaigns.

Monitor what's working.

If you're getting clicks but no sales, you may need to tweak your messaging.

Once you see what's working, scale it up.

If your organic content is driving traffic, double down and create more.

If your paid ads are converting, increase your ad spend.

Take Action and Start Making Money

The most important thing?

Take action.

None of this will work unless you start putting these steps into practice.

Dirk made over \$38,000 in his first seven days online, and it all started with that first step.

Warrior Plus is packed with opportunities, and now you have the tools to capitalize on them.

You've got your platform, your AI tools, and a clear plan.

Whether you go organic or paid, the key is to get started.

You don't need to have everything perfect from the start.

Just get in the game, learn as you go, and keep building.

This is the first step toward becoming a Mega Affiliate...like me, Matt Bacak, and Dirk, who's well on his way.

If a 17-year-old high school kid can do it, so can you.

Now, let's go make that first \$1,000 happen and start your journey to becoming a Mega Affiliate.
